Summary

AI/ML and Full Stack Developer with expertise in Python, NLP, and scalable application development, building efficient, user-centric, and data-driven solutions. Skilled at adapting to new technologies and collaborating effectively to deliver impactful, high-performance software products.

Education

Bachelor of Technology: Artificial Intelligence and Data Science	Aug 2024 – May 2028
Kongu Engineering College	CGPA: 8.00
Higher Secondary	Jun 2023 – Apr 2024
Sri Jayendra Matriculation Higher Secondary School	Percentage: 85.84%
SSLC	Jun 2023 – Apr 2024
Sevai Shanthi Matriculation Higher Secondary School	Percentage: 71.2%

Skills

Languages: Python, Java ,C,C++
Deep Learning Frameworks: TensorFlow, PyTorch, Keras
Web Development: JavaScript, React.js, Node.js, HTML, CSS
Database: MySQL, MongoDB
Libraries & Tools: NumPy, Pandas, Scikit-learn, OpenCV, Git, Docker, LLMs

Projects

Smart AI Notes Summarizer	Aug 2025
Artificial Intelligence	Tech Stack: Python, React, LLM, MongoDB
Developed a multi-modal AI notes generator supporting text, speech, PDF, and image inputs with AI-powered summarization in 18 languages. Built a retrieval pipeline that accelerates note-taking for multilingual users.	
Gamified Learning Platform	Sept 2025
Flutter Application	Tech Stack: Flutter, HTML, CSS, JavaScript
Built an offline-first STEM learning platform featuring interactive games, quizzes, and teacher analytics, optimized for low-bandwidth environments and recognized as a Smart India Hackathon 2025 Finalist achievement milestone.	
RAG Based AI Tutor	Apr 2026
RAG Model	Tech Stack: React, Python, LLM, VectorDB
Created a privacy-focused AI tutor using RAG and local LLM inference, enabling students to interact with study materials through multilingual document-based conversations and personalized learning support adaptive system.	

Experience

Smart India Hackathon 2025 — Finalist	Sept 2025 - Nov 2025
Developed an offline-first gamified learning platform for rural students using interactive games and SVG-based animations, optimizing performance for low-spec devices and limited connectivity to enhance learning accessibility.	
Backend Developer — Cleverstudio (Rikoo AI)	Apr 2026 - May 2026
Developed and maintained scalable backend services, REST APIs, and database systems for AI-powered applications, improving system reliability, performance, and overall application efficiency across distributed platforms.	

Achievements

Thinkathon'26	Jan 31,2025
Runnerup	Dept of AI, KEC
Built Agrounity, a smart agriculture platform for AI-powered crop monitoring, pest detection, and recommendations. Integrated farming tools, chat, tracking, real-time insights, and crop advisory features across platforms.	

Certifications

- IBM Certified Generative AI
- NASSCOM - Data Processing & Visualization
- Infosys - JavaScript Certification
